

1. Google Gemini API Key (Google AI Studio)

🔑 Steps

Step 1: Open Google AI Studio

Go to:

- <https://aistudio.google.com>
-

Step 2: Sign in

- Use your Google (Gmail) account
-

Step 3: Get API Key

- On the left panel, click **“Get API key”**
 - Or go to **API Keys section**
-

Step 4: Create key

- Click **“Create API key”**
 - Choose:
 - Existing project OR
 - New project
-

Step 5: Copy and save

- Copy the key immediately
 - Store it safely (like `.env` file)
-

⚠️ Important

- Treat it like a password
 - Never share in GitHub / WhatsApp / public code
-

💡 Optional (recommended)

Enable billing in Google Cloud if needed for higher usage.

2. DeepSeek API Key

🔑 Steps

Step 1: Go to DeepSeek platform

- <https://platform.deepseek.com>
-

Step 2: Sign up / Login

- Use email or GitHub login
-

Step 3: Open API section

- Go to **API Keys** in dashboard
-

Step 4: Create key

- Click **Create new API Key**
-

Step 5: Copy key

- Save it immediately (you cannot always re-show it)

⚠️ Important

- Keep it in notepad file
- Remember where you kept.
